

Computer Engineering graduate preparing for the CCNA certification with experience in Windows, Linux, networking fundamentals, and troubleshooting through personal lab work. Familiar with Cisco Packet Tracer, GNS3, and system configuration. Seeking an entry level Network Support, Desktop Support or IT Infrastructure Support role where I can apply troubleshooting and technical support skills.

TECHNICAL SKILLS

- Operating Systems: Linux / Windows
- Desktop Support: Software Installation, Driver Installation, Basic Hardware Troubleshooting
- Networking: IPv4, TCP/IP, DHCP, DNS, Subnetting, VLANs, Cisco IOS, NAT/PAT
- Tools: Cisco Packet Tracer, GNS3, Wireshark, VMware, Git
- Documentation: Technical Documentation, Networking Documentations

EXPERIENCE

Operations & Client Coordination Associate

Rollora

Mar 2026 – Apr 2026

On-site

Ramanathapuram, Tamil Nadu, India

- Worked with an early-stage digital marketing startup supporting operational coordination, client communication, and workflow management activities
- Assisted in coordinating operational communication and client follow-ups within a startup environment
- Contributed structural ideas for internal data organization and clear team documentation.

PROJECTS

ARP Sage

GitHub: github.com/Gappyjosuke/arp-sage

- network utility prototype to explore local ARP protocol behavior and packet-level interactions
- Building basic testing scripts to simulate common local network troubleshooting and packet inspection workflows.

Network Engineer Journal

GitHub: github.com/Gappyjosuke/Network-Engineer-Journal

- A learning repository that guides students through networking concepts using structured deployment scenarios, Packet Tracer labs, diagrams, and technical documentation as a reusable learning resource for students preparing for networking roles and CCNA-level concepts.
- Documented network planning, VLAN design, VLSM, Router-on-a-Stick, DHCP, and troubleshooting in a step-by-step format to make complex networking topics easier to follow.

Compiler Design University Lab

GitHub: github.com/Gappyjosuke/Compiler-Design-University-Lab

- Created a verified Compiler Design Laboratory resource, cleanly implemented lab resource to eliminate broken code and messy documentation for Anna University students
- Created structured lab documentation including algorithms, procedures, and verified source code to simplify compiler laboratory workflows for students
- Made an installation script and setup automation workflows for GCC, Flex, and Bison environments on Windows systems

Kurippugal Editor

GitHub: github.com/Gappyjosuke/kurippugal-editor

- A personal workspace and notes taking application heavily inspired by the UI design of *NieR: Automata*.
- Git and GitHub workflows, coordinating code forks, pull request reviews, and version tracking
- Tried to Utilized this custom application platform to introduce my college students to modern open-source collaboration environments

EDUCATION

Bachelor of Engineering (BE), Computer Science and Engineering

Aug 2022 – May 2026

Mohamed Sathak Engineering College, Kilakarai, Ramanathapuram.

CGPA: 8.09

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) — In Progress

Expected Completion: Aug 2026

Cisco

Currently preparing for the CCNA certification.

Git Training — Spoken Tutorial Project, IIT Bombay

Issued Mar 2026

Spoken Tutorial Project, IIT Bombay

Completed Git training and assessment covering version control fundamentals, Git workflows, and collaborative development practices using Git and GitHub.

Cisco Networking Basics — Cisco Networking Academy

Issued Nov 2023

Cisco

Completed networking fundamentals beginner level covering IP addressing, routing basics, wireless networking, cabling, and network operations using Cisco Packet Tracer labs.

ADDITIONAL CERTIFICATIONS

Android App Development using Kotlin

Issued Jul 2025

Spoken Tutorial Project, IIT Bombay

Completed specialized training in mobile application structure, Kotlin fundamentals, and practical Android deployment concepts.
